PROJECTS

Speaking System For Mute People Using Hand Guestures (08/2021 - 06/2022)

- It's very difficult for mute people to convey their message to regular people. Since regular people are not trained on hand sign language, the communication becomes very difficult. In emergency or other times when a mute person travelling or among new people communication with nearby people or conveying a message becomes very difficult. Here we propose a smart speaking system that help mute people in conveying their message to regular people using hand motions and gestures.

MOVIE RECOMMEDATION USING MACHINE LEARNING (08/2021 - 09/2021)

- Recommender systems are information filtering tools that aspire to predict the rating for users and items, predominantly from big data to recommend their likes. Movie recommendation systems **provide a mechanism to assist users in classifying users with similar interests**.

PG Life Web Application (06/2022 - 08/2022)

- PG Life is a Full-Stack Web Application. This is a project that I was assigned to make during my Internshala Full Stack Web Development Internship Training. I got the guidance, and following that I made this web application with my own understanding and knowledge. It is customized according to what I thought would be better functionalities in this app, from the user perspective
